CONCEPT

Chaos. How interesting, to allow something uncontrollable to control my design process and it is always better to be overdressed.

Is a striking change in the shape, lost in a whirl of empty sloganeering, superficial principles and too easy retreats into illusory hedonisms. Thru this collection you can notice artistic ethos, deconstruction, transformation, elevation and finding ways to make it feel more futuristic. Creation can be an act of rebellion the imagination a space of resistance. The key difference lies in the ensembles ability to upset, subvert, disrupt and disorientate any fashion trends, societal conventions, and good manners lurid colour, confrontational mismatches, and wildly color combinations.
